2020 — Azure Administrator Associate (expired)

Professional Summary

"*Sociable Developer*"

is what I often answer when asked to describe my career. Combining intercultural knowledge with coding skills and a passion for UX and UI, I thrive in international environments where I can directly collaborate with team members and clients from diverse backgrounds and fields of expertise.

Work Experience

2023 July – Present

Software Developer, ASCADE

Tokyo | IT solutions industry

- Used React, TypeScript and NodeJs to create impactful user-centric solutions.
- Designed and implemented web APIs and backend solutions using Node.js and AWS.

2022 September – 2023 April

Front-end Software Developer, 4Digit

Tokyo | UI・UX Design industry

- Served as a technical lead for the international team and performed code reviews and translation support.
- Composed React TypeScript applications and delivered high-quality digital experiences with a focus on strong UI and UX.

2021 April – 2022 June

Front-end Software Developer, PENQE

Tokyo | UI・UX Design industry

- Collaborated with design team to ensure seamless integration of design and functionality.
- Developed front-end code for web applications in VueJS and Nuxt while closely interacting with clients on-site to ensure their satisfaction.

2019 April – 2021 April

Front-end Software Developer, CAC

Tokyo | IT solutions industry

- Performed tests on coding projects, identifying and resolving coding errors to improve performance of JavaScript applications.

Support Engineer, CAC

- Worked on-site at the client's office to resolve technical issues and support in English and Japanese.
